

NECK PAD REPLACEMENT

INSTRUCTIONS FOR USE

WARNING

Thank you for your confidence in MSA GALLET products.
Please read the instructions carefully.

Ignoring these instructions may reduce the protection which your helmet is designed to provide. The helmet's level of protection is only ensured if it includes all of its original components. Thus, **any modification of the product or the removal of one of the original components will cause non-conformity of the delivered material**, and will relieve **MSA GALLET** from all liability. Always concerned with the improvement of its products, **MSA GALLET** reserves the right to modify them at any moment without prior notice.

HOW TO REPLACE THE HELMET NECK PAD

This document is an additional information of your flight helmet instruction for use.

1 – How to remove the neck pad out of the helmet:

- Remove the two ear cups (photo 1 below on the left).

Photo 1

Photo 2

- Remove the neck pad **carefully** beginning from one extremity: a part is made of polystyren (photo 2 above on the right).

2 – How to place the neck pad into the helmet:

- Maintain the communication cables against the edge roll (photo 3 below on the left).

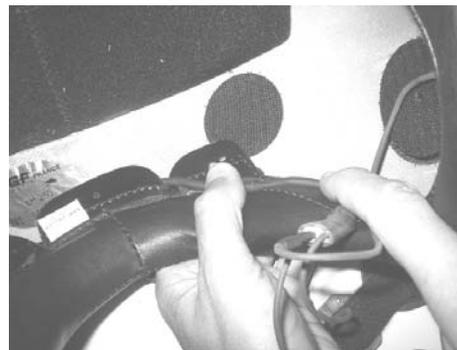

Photo 3

Photo 4

- Center and place the neck pad **carefully** close to the impact cap keeping the communication cables between the neck pad and the edge roll (photo 4 above on the right).

- Place the two ear cups.
